

Season 24/25 - Newsletter 2

The Round 1 countdown has begun

Picks are in....

Teams have been selected for the Leagues and Cups. Player squads have been named, our Captains given their armbands and 'our Ex' lovingly reinstated into the fold

2% of all your Pick Points throughout the season will feed into the Main Table, and this weekend we had 14 Picks games, to add to the 4 last weekend, and so the points gathering has already begun. So here's the top of The Picks Table

We've had games in Belgium and Scotland already in The Picks, and the top of the table early on looks like this.

League Points, Cup Points and Player Points are all shown on the Dash, and last season's winner is highlighted.

This season we have (as I type) 54 in the main league and 6 that have entered a Picks only selection

As always, we lost a couple of players during the summer, but we've also gained a few newbies.

Welcome to Hoggies Heroes and Canada Knows Best, who both joined us for the Euros, and Empire Of The Son, Murder on Zidane's Floor and MullenVoid, joining for the first time in 24/25.

I can still squeeze more new players in before Friday, if you know of anyone that would fancy taking on the challenge.

Here's a bit of a heads up to what's on the website for you this season. As always, I think it's better viewed on a laptop than a phone, I will continue to look for an App we can use that won't swallow up all the sign on fees 🙄🙄 which will hopefully make everything easier to view and navigate on our mobiles.

Anyway, on the website, the Live Dashboard has had a face lift, and has links to the Main & Picks tables as well as the first Cup Competition, The Grand Prix. Scroll down a bit further there's info on the '12' being played in the next/current round, and the Fans H2H games for this round. Spurs Fans won the test event in the second half of last season, but in an expanded League this time round, running across the whole of 24/25, it should prove more challenging.

The Tables Tab in the menu will also give you access to full Tables for The Picks, The Grand Prix Trophy, The Scores Per Round and The Guesswork.

Guesswork is where the guesses from all of us will be shown, once the Round goes live. You will also have a copy of your own guesswork recorded on your own Dash page. When received it will show here your predictions are in, if not in then they will register as "X".

As mentioned previously, The British Heart Foundation has benefitted from the competition sign ups this time round. As has been the way over the last couple of years a percentage of all signing on fees, and any additional donations will go to the charity.

£50.00 from The Euros was added, from Chris Sutton's Euro win, and, once all your fees are in, we're set to donate £650.76 to the charity. Payment details have been emailed to you all, with the new fancy invoice system that comes as part of the website package I use....

That brings the total we've donated over the last 27/28 months, to the 8 charities we've supported, to £5077.18 👍 (Full details are on the Prize Money Tab)

And, if there are any more new joiners, £20.00 more will be added. So spread the word. The More The Merrier

SO, we are DAYS way.....

The Deadline for Round 1 is Approaching and it's on the website NOW

As we get closer to the deadline, I'm gonna chase you.

You know I am 😏😐😂
